Junior Front-End Developer with experience building responsive web applications using React, Next.js, and TypeScript. Skilled in integrating REST APIs and services like Firebase and Stripe, with a focus on clean UI, reusable components, and modern web development practices. Motivated to grow and contribute to real-world projects.

Projects

Candle Store (Next.js E-commerce App)

<https://dimmar.netlify.app/>

- Developed a full-featured responsive e-commerce application using Next.js, TypeScript, and Firestore with a focus on scalability and modern architecture.
- Implemented dynamic product pages with real-time data fetching from Firestore and optimized rendering performance.
- Designed and managed global client-side state using Zustand for shopping cart and UI state management.
- Integrated Stripe for secure payment processing and implemented automated order confirmation emails using Resend.
- Built authentication system with Firebase Authentication, including user session management and protected flows.
- Optimized UI/UX for responsive design across desktop and mobile devices following modern design principles.
- Applied best practices in TypeScript type safety, component architecture, and code organization in a production-like environment.
- Deployed the application on Netlify, managing environment variables and build configurations and production build optimization.
- Built a secure admin panel for product management with role-based access control, enabling full CRUD operations on products using Firestore

Game Store

<https://dimtheoshop-cart.netlify.app/>

- Developed a responsive web application for browsing video games using React and Tailwind CSS, with a strong focus on modern UI/UX.
- Integrated the RAWG Video Games API to fetch and render real-time game data including titles, ratings, genres, and images.
- Implemented advanced search and filtering functionality to enhance user experience and improve content discoverability.

Personal Website

<https://dimitheo.netlify.app/>

- A personal portfolio website showcasing personal projects using React, Vite, and Tailwind CSS
- Designed a clean, modern UI with focus on usability, responsiveness, and component-based architecture.
- Implemented project showcase sections with detailed descriptions and external links to GitHub repositories and live demos.

Professional Experience

Alpha Vocational Training Center

IT Support Technician

Apr 2022 - Present

Nafpaktos, Greece

- Maintenance, expansion and technical support of local network.
- Delivered technical support to end-users, resolving hardware, software, and connectivity issues.
- Managed installation and configuration of operating systems, software applications, and peripheral devices.
- Website and database management

Education

University of Peloponnese

Bachelor's Degree in Informatics

Patras, Greece

Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Zustand.

Backend / Integrations: Firebase (Firestore, Authentication), REST APIs, Stripe, Resend.

Tools: Git, GitHub, NPM, Node.js, Vite, Webpack.

Testing: Jest, React Testing Library.

Concepts: Responsive Design, Agile/Scrum, Debugging, Component-Based Architecture, API integration, State Management, Performance Optimization

Languages: Greek (Native), English (C2)
